

May 15 -21, 2022 is National Public Works Week and the City of Morgan Hill is proud to celebrate the unsung heroes who are always present and ready to serve.

In case you wonder what essential services Public Works offer, Public Works plays a vital role in our daily lives in that it improves our quality of life, promotes economic growth, and provides a safe and healthy environment for our enjoyment. Public Works activities include but are not limited to following:

- Streets, roads, and traffic lights
- Stormwater/Drainage
- Drinking Water
- Waste Water
- Landscapes and Tree trimming
- Engineering (Capital Projects)
- Emergency Response, etc.

So come join us to thank the men and women who keep our Public Works Department strong and show our appreciation for their hard work and dedication. While they will enjoy showing you some of the machinery used in their line of work, they also will be more than happy to discuss with you how, why, and where machinery is used. The Teammates from our Engineering Division will be on hand to answer questions on some of our capital projects. In all, it will be a great learning experience; so, don't miss it.

When: May 19, 2022

10 am – 12:00 pm

Where: Community Park

171 W. Edmundson Ave (Parking Lot Entrance)

**See You There!!!**
